MILK AND ICE CREAM REPORT, SEPTEMBER 1936

This leaflet is published monthly. It will be mailed to any interested person upon request.

The information it contains is compiled from the records of the Health Department pertinent to the milk and ice cream supply of the District. This enables the department to give all inquirers, without undue expenditure of time and effort, the gist of such records.

The records of the department relating to the milk and ice cream supply are open to the public. The character of these records, however, is such as to render it impracticable to furnish complete details by letter. Persons desiring details should call personally for them at the health office.

MILK REPORT, SEPTEMBER 1936

Statement showing the average cattle, farm, dairy, butterfat, bacterial count, and general rating of the dairies selling milk in the District of Columbia during the month of September 1936
